Self-assessment grid

Excel vs 24/7 scheduling software

Check each criterion that applies to your situation. Add up the points (shown in brackets) to get your score.

Volume

- [ ] More than 30 staff to schedule (2 pts)
- [ ] Scheduling horizon longer than 4 weeks (1 pt)

Complexity

- [ ] 24/7 environment (hospital, airport, industry...) (2 pts)
- [ ] Rotating shifts: 12h, 3x8 or 2x8 patterns (2 pts)
- [ ] On-call duties or guard shifts to model (2 pts)

Compliance

- [ ] Mandatory rest periods checked manually (2 pts)
- [ ] Night / weekend fairness to track and measure (2 pts)
- [ ] Formula error already identified (3 pts)
- [ ] Audit or internal control required (2 pts)

Organisation

- [ ] Multiple file versions in circulation (2 pts)
- [ ] More than 4 hours per period to adjust the schedule (2 pts)
- [ ] No draft -> validation -> publish workflow (2 pts)
- [ ] Multiple qualifications or skills per post (1 pt)
- [ ] Unavailability tracked in a separate file (1 pt)
- [ ] Need to simulate several scenarios quickly (2 pts)

Score interpretation

- 0-25%: Green zone - Excel may still be enough for now.
- 26-55%: Amber zone - Plan a move to scheduling software.
- 56-100%: Red zone - Excel is likely reaching its limits.
